

Dear Council,

As a resident whose back yard faces 9th Ave. N we would like to request that 9th Ave N is moved to increase space between homes and the future freeway. I would like to demand a comprehensive noise attenuation plan with fencing, berms and landscaping, which should include already mature trees as to immediately affect the noise.

I would like my email submission to be added to the public agenda for the April.20th council meeting.

Thank you,

Angela Tarnes
