

Appendix B – Treatment Options

Typical Poor Roadway where Maintenance Pave is Appropriate

The road will sustain heavy equipment so treatment can be applied without further damaging the physical structure.

Typical Result of Maintenance Pave

Note there is some ponding, but it is significantly less and will resolve more quickly.

Appendix B – Treatment Options

Note that curbs are buried.

Note that there is potential for cuts in pavement and/or sidewalk to repair underground infrastructure after treatment.

Appendix B – Treatment Options

Note that concrete may not be replaced, but trip hazards will be addressed.

Appendix B – Treatment Options

Typical Poor Road Eligible for Rehabilitation Treatment

Typical Poor Road Requiring Full Rebuild Treatment
