

Are the ride share drivers going to need a Criminal Record Checks? If not, then why not?

When I started in the business we didn't need SGI Inspections or the City Hall Inspections for our vehicles. If the vehicles operated by taxi owners had accidents due to mechanical failure and never heard about it!

The ride share vehicles should be going through the same procedure as a taxi to be able to transport passengers for compensation.

The ride share services should also require class 4 licenses just like a taxi driver as they are doing the same job here.

The City wanted taxi's to have cameras installed in our vehicles. This was supposed to be for the safety of the drivers and passengers. So the question again becomes here are these ride share services going through the same scrutiny?
