Members of Regina City Council

Re: School Zone Safety Report

On behalf of CAA Saskatchewan, thank you for the emailed reports and meeting invitation. At this time, CAA Saskatchewan does not have a report nor wish to address members of City Council.

We would like it noted that [School Zone Safety](#) and the [CAA School Safety Patrol program](#) are two major initiatives supported, sponsored and monitored by CAA SK. Last fall's CAA School Zone Safety Assessment at Judge Bryant and St. Francis Schools, organized by CAA with support by community partners including City of Regina Police Service, Regina Catholic and Regina Public School Divisions, was a very valuable tool to track driver, pedestrian and cyclist infractions during a typical school day. The results strongly indicated that public education and regulated municipal laws are still major requirements regarding pedestrian and traffic safety in Regina's school zones. A copy of last fall's news release with details about the assessment is provided via email.

Please note that at the recent request of the Regina School Pedestrian and Traffic Safety Committee (RSPTSC), another CAA School Zone Safety Assessment will be taking place in March 2019. The date will not be publicly released until after the assessment, as we want to track driver and pedestrian infractions typical of a regular school day. The assessment will be staged by CAA along with members of the Traffic Department and School Resources team of the Regina Police Service, staff from Regina Public and Regina Catholic School Divisions, and members of the RSPTSC representing the City of Regina and Sask. Safety Council.

I can share a copy of the media advisory closer to the assessment date, with Regina City Council, which will include details of the 'next day' news conference where the assessment results will be made public.

In closing, thank you for making the safety of our most vulnerable population, our students, a priority.

Regards,
Per CMN
