

2019 Mid-Year Financial Report

BACKGROUND

The 2019 Mid-Year Financial Report provides a high-level summary of how the City of Regina is performing in relation to its 2019 Operating and Capital Budgets. The report shows that the City is effectively managing its operations within the current economic climate and is forecasting to be under budget for the 2019 fiscal year.

The mid-year forecast reflects an estimated General Fund Operating surplus of \$1.1 million (0.2% from budget). The surplus is a result of a combination of factors including the provision for increased investment income, municipal revenue sharing funding, grants in lieu, and salaries savings from implementation of the management review partly offset by decreases in building permit, parking and landfill gas revenues. The Utility Fund Operating surplus is forecast to be \$2.6 million (1.9% from budget) and is mainly due to higher revenue from water sales and sewer service charges as a result of dryer weather this summer.

The forecast surplus is unaudited and is a projection of the expected results for the City of Regina. Yearend surpluses represent one-time funding and are transferred to the appropriate reserves at yearend. General Fund Operating surpluses are transferred to the General Fund Reserve and Utility Fund Operating surpluses to the Utility Reserve Fund.

FINANCIAL FORECAST OVERVIEW

Throughout the year, Administration prepares and closely monitors the progress of achieving the annual budget approved by Council. The information included in this report is the budget and mid-year financial forecast.

As the corporation works toward delivering services to the community, a variance between the budgeted cost and the projected yearend cost is created. The variance, over or under the established budget, is the result of controllable and uncontrollable factors. These factors include, but are not limited to:

- Changes to expenditures during the year that were not anticipated at the time of developing the budget;
- Staff vacancies:
- Price differences in supplies; and
- Timing of implementing new initiatives or in capital construction.

General Fund Operating Forecast Overview

The General Fund Operating surplus is forecast to be \$1.1 million. As describe below, revenues are projected to be over budget, partially offset by forecasted expenses being over budget due to a combination of factors.

Table 1: General Fund Operating Financial Forecast (in \$ thousands)

Financial Performance Measures June 30, 2019				
General Fund	Revenue	Expense	Surplus (Deficit)	% of Budget
Forecast	\$ 462,117	\$ 460,983	\$ 1,134	0.2%

Operating Revenue

Table 2: General Fund Operating Revenue Forecast (in \$ thousands)

Financial Performance Measures June 30, 2019				
General Fund Revenue	Budget \$ 459,906	Forecast \$ 462,117	Variance 2,211	% of Budget 0.5%

The majority of the City services are financed by General Fund operating revenue. About half of the General operating revenue comes from property taxes, but the City also charges user fees, secures grants from other levels of government and collects revenues from a variety of smaller sources.

Revenues are currently tracking to be slightly above the approved budget by \$2.2 million (0.5%). Revenues are projected to be higher than budget in various areas including municipal revenue sharing, investment income, grant in lieu, partially offset by less revenue from building permits, parking revenue, landfill gas sales and transit fares.

Historical yearend surpluses have been the result of high investment income and capital gains on bonds. These revenues have decreased substantially with the increases in interest rates from the Bank of Canada. There is an inverse effect on long term investment earnings as interest rates rise. The City is actively managing this item to mitigate future capital losses in its long-term investments.

Revenue from external sources are projected to be over budget as a result of investment income, municipal revenue sharing and grant in lieu from Provincial Government. Revenue from fees and licenses, levies and fines are under budget due to a slower economy.

Graph 1 below presents the revenue by category or source.

Operating Revenue by Category - Budget vs Forecast 300,000 250,000 200,000 150,000 100,000 50,000 External (Inc. Allocation & Licenses, Levies Fees and Grants and Taxation Reserve Invesment and Fines Transfers Charges Transfer Income) ■ Budget 249,276 13,807 67,827 49,600 44,492 34,903 Forecast 250,331 13,199 62,907 51,013 47,341 37,325 Variance 1.055 (608)(4,920)1.413 2,849 2,422 Percentage(%) -4.4% -7.3% 2.8% 6.9%

Graph 1: General Operating Revenue (in \$ thousands)

Currently, revenue is forecast to be over budget. Variations from budget is mainly due to municipal revenue sharing, investment income, grant in lieu, less revenue from building permits, parking, landfill gas sales and transit fares.

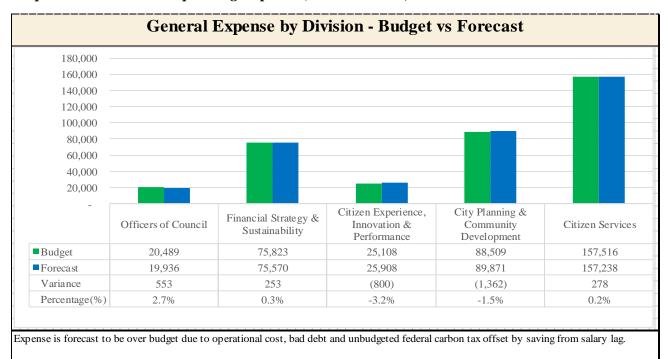

Operating Expense

Table 3: General Fund Operating Expense Forecast (in \$ thousands)

Financial Performance Measures				
June 30, 2019				
General Fund	Budget	Forecast	Variance	% of Budget
Expense				
	\$ 459,906	\$ 460,983	(1,077)	(0.2%)

General Fund operating expenses support the majority of the services provided by the City. Expenses are driven by controllable and uncontrollable factors. Some costs are driven by environmental factors such as the weather and their impact on the services, such as Winter Road Maintenance and are managed by the City by establishing reserves specifically for the purpose of supporting unanticipated costs in any given year.

The current projection reflects operating expenses to be over budget by \$1.1 million (0.2%). The over expenditure is due to a combination of higher than budgeted operational cost and unbudgeted federal carbon tax costs offset by savings from salary lag and the management review.

Graph 2: General Fund Operating Expense (in \$ thousands)

Utility Fund Operating Forecast Overview

The Utility Fund operating surplus is forecast to be \$2.6 million (1.9% above budget). As described below, revenues are projected to be 2.2% higher than budget while expenses are forecast higher than budget.

Table 4: Utility Operating Financial Forecast (in \$ thousands)

Financial Performance Measures June 30, 2019				
Utility Fund	Revenue	Expense	Surplus (Deficit)	% of Budget
Forecast	\$ 142,147	\$ 139,528	\$ 2,619	1.9%

Utility Revenue

Table 5: Utility Operating Revenue Forecast (in \$ thousands)

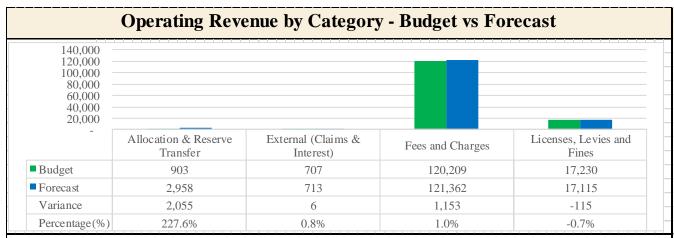

Financial Performance Measures				
June 30, 2019				
Utility Fund	Budget	Forecast	Variance	% of Budget
Revenue				
	\$ 139,049	\$ 142,147	\$ 3,098	2.2%

The Water and Sewer Utility provides water, wastewater and drainage services primarily to customers in Regina. It is operated on a full cost-recovery, user-pay basis. Revenues collected from customers account for the majority of the revenue (88%) with the remainder of the revenue being derived from licenses and levies.

Utility revenues are mainly the result of fees and charges paid by customers through a daily base rate and through a volume (usage) charge. Revenues are influenced by environmental factors and customers are able to reduce their costs by conserving water which will reduce revenues. The mid-year forecast shows that revenues are currently projected to be almost \$3.1 million (2.2%) above the approved budget. The revenue is mainly from water sales and sewer service charges as a result of increased water consumption due to the dry weather conditions this summer.

Graph 3 presents the Utility Operating Revenue by category.

Graph 3: Utility Operating Revenue (in \$ thousands)

Utility revenues are over budget due to revenue from water sales and sewer service charges as a result of dry weather conditions this summer.

Utility Expense

Table 6: Utility Operating Expense (in \$ thousands)

Financial Performance Measures				
June 30, 2019				
Utility Fund Expense	Budget	Forecast	Variance	% of Budget
	\$ 139,049	\$ 139,528	(479)	(0.3%)

Utility Fund Operating expenses support the costs of delivering services in four main service areas:

- Water Supply and Distribution: The system provides water for residential, institutional, commercial and industrial customers, as well as for fire protection.
- Wastewater Collection and Treatment: The wastewater system collects wastewater from all residential, institutional, commercial and industrial customers in the City and treats wastewater in accordance with the Provincial and Federal governments' environmental regulations and industrial standards.
- Storm Water Collection and Flood Protection: The drainage system controls water runoff from rainfall and melting snow in and around the City.
- Customer Service: Customer service has two elements Utility Billing (producing and collecting on utility billings) and Communications (being responsive to customer inquiries and needs).

Many factors influence the costs of delivering the utility services. The mid-year expenditure forecast currently reflect \$0.5 million (0.3%) over budget due to more water purchases from Buffalo Pound Water Treatment Plant as result of increased dryer weather this summer, partly offset by savings from salary lag and operational costs.

Graph 4 details the budget and forecast expenses by division.

Utility Expense by Category - Budget vs Forecast 125,000 2,500 50 1 Professional Salaries & Office & Reserve Internal Utilities **Debt Servicing** Related Costs Admin & External Transfers Allocations Budget 19,037 3,874 14,060 13,146 19,667 41,095 28,170 ■ Forecast 18,478 3.932 20,599 14,060 13.800 42.595 26.063 559 -932 Varian ce -58 -654 -1,500 2,107 2.9% -1.5% 0.0% -5.0% -4.7% -3.7% 7.5% Percentage(%)

Graph 4: Utility Operating Expense (in \$ thousands)

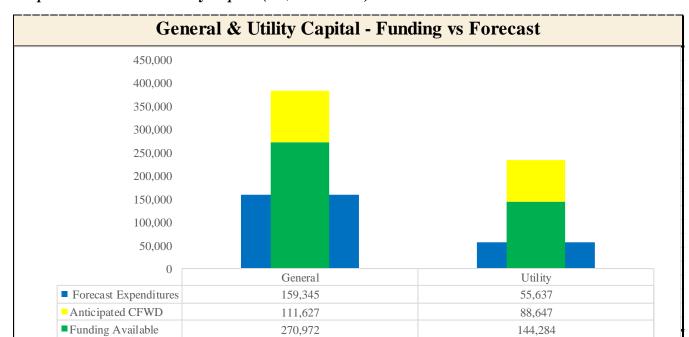

Expenses are projected overbudget as a result of more purchased water from Buffalo Pound due to more water demand, partly offset by savings from salary lag and operational costs.

CAPITAL OVERVIEW

The delivery of services requires well maintained capital assets. The City continues to maintain and enhance its assets by prioritizing the investment in capital that will maintain or improve services or service levels.

The City's capital budget is a multi-year (five year) program comprising an approved capital plan for the current year and a planned program for the succeeding four years. With the multi-year approach, some projects are designed to be completed over a number of years resulting in unspent capital funding at the end of the year that will be carried forward to the future year. The City is continuing to complete a number of multi-year projects and utilizing the majority of the funds available.

The City's capital spending is represented in two groups: General Fund and Utility Fund (Graph 5).

Graph 5: General and Utility Capital (in \$ thousands)

Overall, all General and Utility Capital projects are on schedule and on budget. The capital carry forward is largely for a number of multi-year projects scheduled. There has been a significant increase in capital expenditures over the past 5 years in order to bridge the infrastructure gap faced by the City. Major initiatives includes, but not limited to Regina Police Service Headquarter Complex, RRI Railyard Renewal, Transit Maintenance Garage Relocation, Street Infrastructure Renewal, Trunk Relief Initiative, Water Pumping Station, Water Infrastructure Renewal, The Creeks Wastewater Pump Station Expansion and Highland Park/City view (Area 13A).

General and Utility Capital

1. General Capital

The General Fund capital budget is primarily focused on the renewal of infrastructure, a priority of the strategic plan and linked to *Design Regina: The Official Community Plan* priority of long-term financial viability. General Fund capital spending is in two categories: programs and projects. Programs are mainly ongoing capital costs that are designed to support the maintenance and renewal of assets to enhance and/or prolong their useful life. Capital projects are one-time costs with a defined start and end date, such as the cost of constructing a new asset.

The current 2019-2023 General Capital plan totals \$534 million. The General Capital Fund plans to spend \$127 million in 2019. This includes completing and/or advancing a number of projects including, but not limited to:

- Street and Bridge Infrastructure Renewal Programs
- Residential Roads Renewal Program
- Parks and Facilities Yard Development
- Waste Management Centre
- Transit Fleet Maintenance Facility
- Regina Police Service Headquarter Complex
- Regina Revitalization Initiative (RRI) Railyard Renewal Project

2. Utility Capital

The Utility Fund capital budget supports the delivery of the utility service through maintenance, renewal and replacements of a diverse infrastructure including water mains, storage reservoirs, pumping stations, building service connections, a wastewater treatment plant, wastewater and storm drainage sewers as well as drainage channels and creeks. The City is also a joint owner of the Buffalo Pound Water Treatment Plant with the City of Moose Jaw.

The 2019-2023 Utility Capital Plan totals \$414 million and is fully funded by the Utility Reserve over the five-year plan. The majority of the \$58.5 million in Utility Capital Fund focuses on water, wastewater and drainage infrastructure renewal projects in 2019.

The City has seen a reduction in the amount of unspent capital funding in the last few years. This unspent funding is largely for a number of multi-year projects scheduled to be completed over more than one year. The City budgets capital based on the cash flow requirements of the project. This allows the City to better manage the capital funding requirements and reduce the unspent capital funding at yearend. Overall, all General and Utility Fund capital projects are on schedule.

There has been a significant increase in capital expenditures over the past five years in order to bridge the infrastructure gap faced by the City. This increase in capital expenditures has been funded primarily from an allocation of current year operating costs, reserves, debt, and third party funding. The current year contributions to capital funded from taxation revenue has increased from \$34 million to \$49 million in the last five years.

The weather in 2019 has cooperated for the delivery of the capital program and as of mid-August, planned capital work was 60% complete – on schedule according to the plan.

CONCLUSION

The City of Regina is committed to accountability, transparency and following best practice in its financial reporting. The results of this report show the City is projecting a small surplus at yearend.

The surplus is a point in time projection of the yearend results. There are a number of variables that could influence the surplus on both the operating and utility results that were not known at the time of the establishment of the mid-year forecast. Administration has used the best information available to predict the outcomes to the end of the year.

As the year progresses, the results will change based on decisions made and uncontrollable factors such as weather that impact City operations. Administration will continue to monitor the financial situation and balance fiscal stewardship with providing the services that citizens of Regina need.
