

I am a long term resident of Regina, and I want you to know what is important to me. I am deeply concerned about the climate instability that we are all facing. And I am very proud that my city council approved a plan to reduce emissions and be a carbon neutral city by 2020.

I know this is a somewhat daunting task, and I am hoping that you are all up to the challenge. Our children are deeply concerned about their future and are looking to us for guidance . This is an opportunity to support alternative energy sources , and creating economic opportunities for local businesses.

So please let me know how you will be voting when the energy and sustainability strategy is voted on on October 28th.

I look forward to hearing your response.

Sincerely,
Jill Forrester
