

Good Day,

I would like to add my voice in support of this motion. It's become dangerous up here. I no longer ride my bike on that stretch of road with the trucks and I can't count the number of times that trucks change lanes, without signalling, in the Courtney intersection-an illegal and unsafe move. I was almost in an accident one morning as I was making a rt turn to head east on 9th ave when a semi, moving above the speed limit changed lanes in the intersection.

While I appreciate the truckers concerns and I'm sure the bulk don't speed and change lanes in intersections the amount of commuter traffic on 9th is significant without adding trucks to the mix. There will be a fatality at some point.

The billion dollar bypass was to be the truck route-let's use it as such and force the trucks off 9th ave.

Thank You
Jon Anderson
