

**9th Ave North should not be a heavy truck route, that is what the bypass is for.**

**Any argument should be irrelevant here because we built this big beautiful bypass that was specifically for trucks. We were sold this bypass because it was going to REDUCE LARGE TRAFFIC and make it SAFER FOR REGULAR TRAFFIC. It was going to REDUCE NOISE and REDUCE CARBON EMISSIONS WITHIN THE CITY.**

**It's frustrating that now that the bypass has been built, the amount of heavy TRUCK TRAFFIC HAS EXPLODED HERE.**

**If large heavy trucks are not going to use the bypass properly, then why did Reginans' taxes go towards building it?**
