

CP20-88

It is my understanding motion 20-23 will soon be considered by council regarding traffic on 9th ave North. This email is in support of this motion.

As a westhill resident since 1985 with our property backing on to 9th ave N we have experienced a significant increase in heavy truck traffic, speeding vehicles and traffic noise since the opening of the new regina bypass.

This poses not only a serious safety concern but negatively impacts our ability to quietly use and enjoy our property.

We further expect that this traffic may well be greater than the design capacity of the current roadway which will result in the need to resurface earlier than anticipated and increase ongoing maintenace costs.

Thank you

Ken Yanko
