

Good morning,

I am writing to you as someone who is concerned with the amount of large semi trucks that are now using 9th Avenue N since the opening of the bypass.

We have lived in our house that backs 9th Ave N for approximately 3.5 years. Since the opening of the bypass, traffic has increased a lot. Not just cars but giant trucks that are barreling down this road. A road that really was not designed to support the sheer amount of trucks driving down it.

I would love to see the heavy truck and dangerous good designation removed from this road. It is traveling through a residential area. I can't understand what dangerous goods and semis would even be allowed to drive that speed through a residential area.

A lot of money was invested into the bypass to keep traffic like semis, off of the roads in the city. Yet, they don't want to take the time to continue to go around.

In the time it took me to type this email (5 minutes) I have heard 4 large semis fly by my house.

Thank you for your consideration.

Lindsay Morhart
